Title Index

Business forecasting, input-output analysis and, 453

Computer-based conferencing with anonymity, Delphi conferencing, 159

Construction of Delphi event statements, 65

Counterintuitive behavior of social systems, 1

Cross impact analysis, an alternative approach to, 309

Cross-impact model, an elementary, 341

Curricula, a forecast of, and methodologies in secondary education in the year 2000, 137

Delphi conferencing, computer-based conferencing with anonymity, 159

Delphi event statements, the construction of, 65

Delphi, the policy, a regional planning application, 481

Developing industries, the impact of technical progress on unit price of selected products in, 473

Dynamic modeling, forecasting through, 291

Education, a forecast of curricula and methodologies in secondary, in the year 2000, 137

Education, engineering, exploring new directions in, 391

Electric generator size, the step-wise growth of, 465

Engineering education, exploring new directions in, 391

Environmental and population problems reconsidered, 403

Environmental policies, impact on raw-material markets of, 353

Expert judgment, some views on the use of, 279

Forecasting, from conjectural art toward science, 415

Growth of electric generator size, the step-wise, 465

Impact of technical progress on unit price of selected products in developing industries, 473

Industrial behavior, the analysis of, and its use in forecasting, 205

Innovation, on the sustenance of technological, 273

Input-output analysis and business forecasting, 453

Marine transportation systems, technological forecasting of, 1970 to 2000, 99

Mathematical model for trend forecasts, 441

Methodologies, a forecast of curricula and, in secondary education in the year 2000, 137

Methodology, subjective, in forecasting, 427

Model, a mathematical, for trend forecasts, 441

Model, a simple substitution, of technological change, 75

Model, an elementary cross-impact, 341

Modeling, forecasting through dynamic, 291

Natural resources, the United Nations Committee on, and its challenge, 155

PATTERN technique, requirement analysis, need forecasting, and technology planning using the Honeywell, 255

Policy Delphi, a regional planning application, 481

Population growth, world, and related technical problems, 23

Population problems, environmental and, reconsidered, 403

Raw-material markets, impact on, of environmental policies, 353

Regional planning application, the policy Delphi, 481

Requirement analysis, need forecasting, and technology planning using the Honeywell PATTERN technique, 255

Risk assessment, technology forecasting and, in V/STOL transport area, 89
Science, forecasting, from conjectural art toward, 415
Secondary education in the year 2000, a forecast of curricula and methodologies in, 137
Social systems, counterintuitive behavior of, 1
Subjective methodology in forecasting, 427
Substitution, a simple, model of technological change, 75
Technical progress, the impact of, on unit price of selected products in developing industries, 473
Technological change, a simple substitution model of, 75
Technological forecasting of marine transportation systems, 1970 to 2000, 99
Technological forecasting, what and whither, 51
Technological innovation, on the sustenance of, 273
Technology forecasting and risk assessment in V/STOL transport area, 89
Transportation forecasting, a review, 367
Transportation systems, technological forecasting of marine, 1970 to 2000, 99
Trend concepts, application of, in forecasting typesetting technology, 225
Trend forecasts, a mathematical model for, 441
Typesetting technology, application of trend concepts in forecasting, 225
United Nations Committee on natural resources and its challenge, 155
V/STOL transport area, technology forecasting and risk assessment in, 89
World population growth and related technical problems, 23
